

Midnight Moonlight Maritime Marathon
Notice to Competitors
Posted 10/2/20 @ 1600

At this time the airnow.gov air quality forecast for Saturday afternoon and evening is an AQI of 165 in the central and northern portion of SF Bay. That is very similar to the current actual AQI here on Friday.

The government deems an AQI of over 150 to be “unhealthy for everyone,” and advises everyone to “Reduce your exposure by choosing less strenuous activities or shortening the amount of time you are active outdoors.”

The SFYC has taken steps to eliminate the outdoor race committee requirements from the sailing instructions in accordance with this guidance, and the start and finish line descriptions have been changed. Please use your own judgment in your decision to participate in this race. Any boats wishing to withdraw their registrations will receive a full refund if they email that decision to race@sfyc.org prior to their posted start time.

Thank you,
SFYC Race Department
